### COURSE DESCRIPTION

A short course on Traffic Flow Theory will be presented at GeoTech, Management and Transportation Engineering section at the Department of Civil Engineering at Stellenbosch University. The course is offered from the 28th May—01st June 2018. Industry participants are welcome to attend.

**ECSA CPD points = 5**

### OBJECTIVE

A basic understanding of the principles, theory, and application of the interaction of traffic on roadways and the resultant quantification thereof. This includes an understanding of traffic flows, traffic interaction, arrival patterns, types of traffic studies and the control of traffic.

Practical experience in applying these theories in real world examples and making sense of the outcomes of the theories.

### OUTCOMES

The ability to quantify and evaluate the operations of various elements of the transport network.

### LANGUAGE

The course will be presented in English.

### WHO SHOULD ATTEND

Transport Engineers and Planners with a specific interest in traffic engineering

### COURSE ARRANGEMENTS

**The fee covers course material as well as teas and lunch.**
