

Isobel Brink

Water Treatment Research

University of Stellenbosch

Career Summary

Dr Isobel Brink is a lecturer and early career researcher in the field of Water Treatment engineering. She recently obtained her PhD in the area of stormwater quality. She lectures the University of Stellenbosch undergraduate Water Treatment course and supervises post graduate masters and doctoral students who do research in various Water Treatment engineering areas. These include stream pollutant modelling, point-of-use water treatment systems, pilot plants for sewage treatment, bio-remediation of agricultural land runoff and parking lot stormwater runoff quality improvement. To date she has published two peer-reviewed journal articles.
