PROGRAMME DISCIPTION

The CMP is a middle management programme for engineers and other practitioners who have the potential for advancement into corporate management. The relevance of the programme to the industry and the country is one of the primary reasons why senior managers and other professionals enrol in the programme. Alumni of the CMP can be found in leading management positions in the construction industry.

The CMP is presented over a period of three weeks using the total emersion learning methodology to expose delegates to the very latest theories, tools and techniques in all aspects of business management in the *construction sector*. CMP alumni are to be found in key positions in *construction* in Africa and around the world.

An extended list of high profile International and South African speakers participate in the presentation of the programme.

WHO SHOULD ATTEND

Participants to the programme include delegates from client (owner) organisations, consultants and construction firms. Professionals in middle management with 8 to 15 years of experience in the construction industry can apply.

BRIEF OVERVIEW OF THE PROGRAMME

OBJECTIVES		DISTINGUISHING FEATURES
To <i>build management and leadership capacity</i> in the construction sector		Develops future leaders
To facilitate an <i>improved understanding</i> between all participants in the <i>construction sector</i> .		Collectively seeks synthesized and holistic solutions to industry challenges
To gain an understanding of the needs of customers and clients for improved <i>customer satisfaction</i>		Builds a network of relationships between delegates
To develop an inclusive industry which <i>satisfies the needs of society-at-large</i>		Tests delegates in a stressful environment to prepare them for the challenges in the workplace
