OBJECTIVES

The course introduces the fundamental principles of pre-stressed concrete design and continues with the application thereof for post and pre-tensioned bridge decks and building slabs. Worked examples are presented.

OUTCOMES

Attendees will be able to understand the fundamental principles of pre-stressed concrete and the design of post and pre-tensioning for bridges and building slabs.

COURSE ARRANGEMENTS

This course will be presented in hybrid mode: (Face-to-face on the Stellenbosch Campus & Online via MS Teams) Details will be forwarded to registered delegates once payment has been received.
