

SHORT COURSE: PAVEMENT MANAGEMENT SYSTEMS

DEPARTMENT OF CIVIL ENGINEERING • 30 September to 4 October 2024

COURSE COORDINATOR

Prof KJ Jenkins
SANRAL Chair in Pavement
Engineering

Gerrie van Zyl
MyCube Asset Management
Systems

FEES:
5-day course
R 11 500.00

ECSA CPD POINTS: 5

PLEASE NOTE: ONLY DIGITAL
CERTIFICATES WILL BE ISSUED

LANGUAGE
All presentations: English

PROGRAMME
Detailed timetable will be sent
to registered delegates

GOALS OF THE COURSE

This course focuses on pavement management of surfaced and gravel roads. South Africa has some 150 000 kms of surfaced roads and 600 000 kms of unsurfaced roads. It is therefore imperative that sound management principles are applied to this network, differentiating between the respective authorities' appropriate requirements.

The PMS course will be done in person and is aimed at engineers, technologists and senior technicians who are:

- considering implementing a pavement management system in their network or becoming involved in a PMS;
- involved in a PMS and wish to upgrade their knowledge.

Comprehensive notes will be provided.

COURSE OUTLINE

Module 1 - Road Asset Management
Module 2 - Pavement Performance
Module 3 - PMS components and Data Collection
Module 4 - Analysis
Module 5 - Asset Management plans and work programs
Module 6 - PMS Operation and Project Presentation

LEARNING PROCESS

The delegates will have the opportunity to immerse themselves in the subject matter, through a series of lectures that will be augmented by virtual workshops and tutorials.

COURSE ARRANGEMENTS

This course will be presented **Face-to-face** on the Stellenbosch Campus. Details will be forwarded to registered delegates once payment has been received.
